## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-10, 15-17, 19-21, 25-27 and 29-35 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1, the prior art of record does not teach nor suggest, in the claimed combination, an actuator device with a spine member having a length; a first plate and a second plate, the first plate fixed to the spine member at a first location along the length of the spine member and the second plate fixed to the spine member at a second location along the length of the spine member, wherein the second location is spaced from the first location; and a first actuator positioned between the first plate and the second plate for selectively creating a push and/or pull force between the first plate and the second plate to change the orientation of the first plate relative to the second plate the first actuator includes a first array of electrostatically actuated unit cells wherein at least some of the electrostatically actuated unit cells are actuated from an expanded state to a closed state in response to an applied electric potential and wherein at least some of the electrostatically actuated unit cells include: a first flexible member having a first electrode and a second flexible member having a second electrode wherein the first flexible member is attached to the second flexible member at selected spaced locations wherein the first flexible member is pulled toward the second flexible member when the electric potential is applied between the first electrode and the second electrode.

Claims 15, 29-31, 33 and 35, the prior art of record does not teach nor suggest, in the claimed combination, a flexible member with a spine member having a length; two

or more plates attached at spaced locations along the length of the spine member, selected plates forming a plate pair and one or more actuators positioned between and fixed to at least selected plate pairs for creating a push and/of pull force between the corresponding plate pair and to change the relative orientation of the plate pair.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
